

disclosure of U. S. Patent Series No. 09/737,955 so as to overcome the object of new matter in the office action. However, the disclosure is not described in the specification and drawings, and thus the IDS about this prior art is unnecessary.

IN THE SPECIFICATION

Please amend the background of the invention and brief description of the drawings as the following. The clean copy of the amended specification is attached, where the number of the page is renumbered so as to begin from page 1, which is corrected in the office action by Examiner.

(A) Please amend the background of the invention of the present invention as the following. Amendment of the background of the invention is desired to cancel the related prior art U. S. Patent Series No. 09/737,955 so as to overcome the objection of new matter in the office action.

BACKGROUND OF THE INVENTION

1. FIELD OF THE INVENTION

The present invention relates to skates, and particularly to an easily adjusted skate, wherein user can press a buckle from a lateral side of the skate so that engaging teeth of the buckle is released; and thus the size of the skate is adjusted.

2. Description of Related Art

Skating is an exercise consuming a large amount of heat. ~~In general, one of the commercial skate can be assembled with the general shoes, as shown in Fig. 5, where a prior art skate 2 is illustrated (referring to U. S. Patent Series Number. 09/737,955).~~ One of prior art states ~~This kind of skate~~ has a front seat 4 with an elliptical receiving hole ~~(not shown)~~ and a rear seat 3 which is tightly locked to a rear end of the front seat. When it

is desired to adjust the size of the skate to match the size of the feet of the user, a stud ~~45~~ may be tightened so that the stud may move in the receiving groove to a desired length. However, this kind of skate has some shortcomings which are necessary to ~~may be improved upon~~.

(B) Please amended the brief description of the drawings in the specification as the following, wherein the description of Fig. 5 is deleted since the Fig. 5 is deleted from the specification and drawings.

Brief Description of the Drawings

Fig. 1 is an exploded perspective view of the present invention.

Fig. 1A shows the details of the buckle structure illustrated in Fig. 1.

Fig. 2 is an assembled perspective view of the present invention.

Fig. 3A is a plane view showing the engagement state of the present invention.

Fig. 3B is a plane view showing the disengagement state of the present invention.

Fig. 4 is a plane cross sectional view of the present invention.

Fig. 4A shows the details of the front seat illustrated in Fig. 4.

~~Fig. 5 shows a schematic view of a prior art skate.~~
